SCOPE OF THE INSPECTION: The real estate inspection to be performed for Client is a non-invasive physical examination, performed for the fee set forth below, designed to identify material defects in the systems, structures, and components of the above-referenced primary building and its associated primary parking structure as they exist at the time of the inspection(s). A material defect is a condition that significantly affects the value, desirability, habitability or safety of the building. Style or aesthetics shall not be considered in determining whether a specific system, structure, or component is defective. The inspection shall be limited to those specific systems, structures, and components that are present and visually accessible. Components and systems shall be operated with normal user controls only and as conditions permit. Where applicable the inspection **shall** be performed in accordance with the Standards of Practice of the Florida Association of Building Inspectors (FABI) in effect at the time of this inspection. The inspector may use local minimum construction standards and accepted trade practices to determine if a system or component is a material defect. This inspection is not intended to be technically exhaustive. Inspector shall prepare a written inspection report for the sole use and benefit of Client(s). The inspection report shall describe and identify the inspected systems, structures, and components of the building and shall identify material defects in those systems, structures, and components observed during the inspection. Client agrees to read the entire inspection report when it is received and shall promptly notify the Inspector with any questions or concerns client(s) may have regarding the inspection and/or the inspection report.
